Numerous awards for its internationally leading designs demonstrate the high regard in which KWC is held across the world.

## Designers

It is in Milan, as a partner of Matteo Thun, where Michael Lammel met his current colleague, Bertand Illert. In 2000, Lammel and Illert founded the collaborative venture NOA Design Studio. NOA creates modern product solutions with a focus on aesthetics, function and innovation. Over the past six years, NOA has used its insights about future trends and technologies to develop an extensive product range together with KWC.

## Form and function

Outstanding quality always includes two aspects: the aesthetic form and the functional. At KWC we look to nature for inspiration when designing faucets so as to always create exceptional new lines: as durable and resilient as a piece of granite, as impressive and beautiful as a mountain landscape.

# KWC ONO

KWC ONO is a masterpiece of contemporary design: delicate in proportion, first class in materials, perfect in workmanship. The characteristic highflex™ spring hose, in refined black, brings together style, flexibility and top performance. Innovative technology in an ingenious presentation.

# KWC LIVELLO

KWC LIVELLO is a high-quality kitchen faucet that meets the highest expectations. A transverse body and clear use of forms characterize this innovation, which adds a welcome touch to sophisticated residential buildings.

# KWC SUPRIMO

KWC SUPRIMO manifests its high quality at every glance and touch, and this can be summed up in two words: stainless steel. The elegant, sparse, sleek design and unequivocally precise ease of use guarantee a sparkling appearance in any modern kitchen.

# KWC SYSTEMA

KWC SYSTEMA is the high-performance professional solution for private households and at the same time a design object of timeless elegance. The robustness of the unit contributes to perfect functionality that makes it an utterly reliable helper in the kitchen, for a lifetime.

# Creativity and emotion

Evoking emotion is part of the high art of good product design. By adopting a creative, innovative approach to shapes, colors, materials and technologies, KWC time and again produces faucets with a “soul” that can touch and enthrall, by appealing to the emotions as well as the rational mind.

# KWC SIN

KWC SIN highflex™ is a world's first, uniting two innovative functions: two spray modes – with the flexible, patented highflex™ spring hose in silver gray – and a swivel spout. The entire range, available in four different versions, makes an impressive impact with its stylish design and functional versatility.

# KWC EVE

KWC EVE is a shining example of KWC's creativity and innovation. The unique combination of high-quality metal and a stream of water subtly illuminated by LEDs creates a sculpture of light that beguiles with its slim, curved and feminine outline, transforming it into an object of desire.

## Peace and harmony

Feeling safe and secure. KWC takes the desire for reliability very seriously – with faucets that stand out thanks to their precision, long lifespan, diversity of functions and timeless design. With all these aspects, the focus is on one point: outstanding Swiss quality.

KWC AVA

KWC AVA turns the daily interaction with water into an experience of sparkling pleasure. The combination of cylinder and cube forms a single harmonious unit that makes many things possible – and all things a little easier. Simply beautiful. Simply water.

# KWC DOMO

KWC DOMO is a real classic and over the years has become virtually synonymous with kitchen faucets. Since it was first launched in 1982, this successful model has been subtly redesigned a number of times, so it has always remained contemporary.

# KWC LUNA

KWC LUNA is a faucet full of beauty and character. On the one hand, there is the harmonious, slimline design, and on the other, an impressive array of functions – not to mention the knowledge that this premium product is setting new standards in an attractive price range.

# KWC soap dispensers

KWC Soap dispensers are in tune with the trend towards uncluttered, functional kitchens. They match the various different faucet lines in design and character and, with their discrete elegance, create an atmosphere of order and clarity.

# KWC Bath

The bathroom is a place of rest and relaxation. It is where elegance meets indulgence, where aesthetics meets sensuousness, where quality meets passion. KWC faucets give the bathroom a personal touch, the magic of an oasis of well-being.

# KWC ONO

KWC ONO is a masterpiece of minimalism. Delicate design and high-quality materials and craftsmanship are reflected in every detail of this range of faucets, to give a touch of prestige to the modern bathroom.

KWC ΔΔΔ

With KWC AVA, the extraordinary becomes a matter of course. The slim proportions and cubic style are the defining characteristics of this range which creates such a confident, striking impression. It forms a link between traditional products and modern design, while fully accommodating the desire for individuality.
